Term-Project (Option 2)
(You need to do either Option 1 or Option 2. You do not have to do both.)

- Selection of Papers
    - You (**each individual student**) will write a survey paper about a topic you select.
    - You need to select **at least 6 papers**.
    - All selected papers should discuss a similar topic which is related to **Distributed Database and/or Parallel Database** since the comparisons and analyses among them should be included in your term paper.
    - Each selected paper should be **at least 4 pages, and should be published in 2019 or after**.
    - The relative papers can be found in the following sites:
      [ACM Search Site: https://dl.acm.org/]
      [IEEE Search Site: https://ieeexplore.ieee.org/Xplore/home.jsp]
    - You can download the papers from the above sites when they are accessed through UNT on-campus computer.
    - To download the papers from the above sites using off-campus computer, you need to do VPN to UNT first, then connect to on-campus computer.
    - If not available, please use some general search engines (google, yahoo, ...).

- Submission of information for your selected papers
    - **Due: Feb. 08** - Submit the paper information (Authors, Title, Conference or Journal Name, pages, and Published Date) of the selected papers to Instructor and TA by UNT email (**not through Canvas)** using **Submission Form** (submission_form2.docx).
    - When you submit it for the first time, please check with all papers in the following file to avoid any duplication.
        - Merged_List2(2019_2023).pdf
    - From the second submission, please check with all papers in the following two files to avoid any duplication.
        - 5370_List_S24.pdf (which is for this course in the current semester)
        - Merged_List2(2019_2023).pdf
    - After one week to 10 days from the due date, you will receive a confirmation email whether your submission is OK or not. If your submission is OK, you can start your term paper with your submission.

- Submission of your term (survey) paper
    - **Due: Apr. 25** - Submit your survey paper based on the selected papers as a term-paper using Term (Survey) paper Form (survey_form.docx).
    - Guideline for Term paper (GuideT.pdf).
    - To submit a term paper, you need to login to Canvas, and submit through Canvas.

- Presentation

- Finally, present the term paper in the class by Zoom using PPT slides. The Zoom link will be available in Canvas.
- Your presentation schedule (**CSCE_5370 presentation dates.xlsx**) will be available in the middle of March on Canvas. If you want to present in a different date, you need to find someone who is willing to switch the presentation date with you, then send TAs and Instructor an email with detail of switching.
- You do not have to finish your term project by your presentation date if your presentation is before the due date of the term paper submission. You can just present whatever you complete by your presentation date. I just want to give more time for all students to finish the term project. I will consider each student's presentation date, so it will be all fair.
- If you are a presenter of a certain day, you need to join the Zoom lecture meeting **at least 15 min. early**.
- You need to submit your presentation file by the due date, **May 02**. To submit it, you need to login to Canvas, and submit through Canvas.
- Your presentation will be graded based on **Presentation Grade Criteria for Option 2** (Presentation Grade criteria2.pdf).
